DRAFT 100% DESIGN REPORT, VOLUME 1 OF 3, GROUNDWATER MODELING  
AND DESIGN ANALYSIS, OPERABLE UNIT 1, FRITZSCHE ARMY AIRFIELD FIRE  
DRILL AREA, FORMER FORT ORD, CALIFORNIA

Dear Ms. Youngblood:

The Department of Toxic Substances Control (DTSC) has reviewed the "*Draft 100% Design Report, Volume 1 of 3, Geology and Conceptual Design, Operable Unit 1, Fritzsche Army Airfield Fire Drill Area, Former Fort Ord, California,*" dated June 30 (Draft 100% Design Report, Volume 1 of 3). The document was prepared by HydroGeoLogic, Inc., for the United States Department of the Army, Corps of Engineers, Sacramento District. The 100% Design Report, Volume 1 of 3 adds additional geologic data and amends the original site conceptual model to aid in design of the Former Fort Ord Operable Unit 1 groundwater extraction system.

DTSC reviewed the Draft 100% Design Report, Volume 1 of 3 and the response to DTSC comments. The Army has adequately addressed DTSC's comments, and we have no further comments.

If you have any questions, please contact me at (916) 255-6403.

Sincerely,

Susan Goss, P.G., C.H.G.  
Remedial Project Manager  
Office of Military Facilities
